

What Is Claimed Is:

1. (Cancelled)

5 2. (Cancelled)

3. (Cancelled)

4. A sunglasses holder, which is suitable for combining a pair of sunglasses with
10 a cap, a woolen cap, a jogging hair-band, a sports cap (suncap), a sun visor, a helmet,
and the like, comprising:

- a) a fixing member having a fixing means for fixing to the cap or the like;
- b) a connection member coupled to the sunglasses; and
- c) hinges formed respectively in the fixing member and the connection member,
15 the hinges being rotatably coupled to each other by a hinge pin and having a toothed
wheel formed in the side wall such that they are engaged with each other, thereby
enabling an adjustment of angle.

5. A sunglasses holder, which is suitable for combining a pair of sunglasses with
20 a cap, a woolen cap, a jogging hair-band, a sports cap (suncap), a sun visor, a helmet,
and the like, and can be carried in a disassembled state when not in use, comprising:

- a) a fixing member including a body having an opening formed at the under face
and a hole formed at both sides thereof, a resilient piece having a button projected
through the hole, and a fixing means for fixing the body to the cap or the like;
- 25 b) a detachably-attaching member inserted into the opening of the fixing

member to be coupled with the fixing member, the detachably-attaching member having a resilient hook formed such that it can be released from the fixing member by pressurizing the resilient piece;

c) a connection member coupled to the sunglasses; and

5 d) hinge formed respectively in the detachably-attaching member and the connection member, the hinges being rotatably coupled to each other by a hinge pin and having a toothed wheel formed in the side wall such that they are engaged with each other, thereby enabling an adjustment of angle.

10 6. A sunglasses holder according to claim 4 or 5, wherein the fixing means of the fixing member includes a bolt, a support plate is integrally formed at both sides of the body, and the support plate has a hole for the bolt to pass through, thereby enabling a bolt coupling.

15 7. A sunglasses holder according to claim 4 or 5, wherein the respective hinge or either of them has a female thread form at the inner circumference thereof, and the hinge pin has a male thread formed at the outer circumference thereof, correspondingly to the female thread.

20 8. A sunglasses holder according to claim 4 or 5, wherein the fixing member is coupled to upper portion of a cap visor.
